To be able to simply turn on my radio at any time on any day - and have access (commercial free at that) to local weather & traffic information is PRICELESS. Well, it's actually not - I pay for that service, and I do not think that anyone has the right to dictate what I listen to when I am paying for the service. I respectfully urge the FCC to reject the NAB's petition 04-160. It would be a different situation if XM Radio was free, but it's not.....its a paid for service --
